SKIN CANCER FOUNDATION

To earn the *Seal of Recommendation*, a manufacturer must prove that its product sufficiently and safely "aids in the prevention of sun-induced damage to the skin."

The requirements include:

- A sun protection factor (SPF) of 15 or greater.
- Validation of the SPF number by Testing on 20 subjects.
- Acceptable test results for phototoxic reactions and contact irritation.
- Substantiation for any claims that a sunscreen is water- or sweat-resistant.

Test Type:

STATIC & VERY WATER RESISTANT

Method:

- FDA Final Monograph 1999:
Full Study (as per methodology)

PHOTOTOXICITY

Panel Size

- 20 Subjects

Patch Type

- Semi-occluded
 Occluded
